

Reliable & Scalable Business Communications Services

Conterra Networks is a leading provider of premium bandwidth services and private fiber, microwave, and hybrid networks. Since 2001, Conterra Networks has successfully served customers in rural and metropolitan areas in 22 states across the U.S., with a focus on education, healthcare, enterprise, government, and carrier wholesale industries. We build, own, and operate customized carrier-class fiber and wireless network solutions to solve the challenges of scalability, congestion and oversubscription, performance and reliability. Our approach emphasizes collaboration, working with you to build high-quality, scalable solutions that meet your existing and future network needs.

Grow and equip your business for success by enabling limitless communications.

Conterra Networks' Capabilities

Conterra Networks offers best-in-class solutions to fit your every need, from technology and bandwidth demands to geographic diversity.

- Our engineering experts design and build low-latency, high-quality broadband networks.
- Our flexible fiber-based networks provide solutions for you today and into the future.
- We deploy our networks within specified time-lines, securing all required permits, licenses, and regulatory approvals.
- Our 24x7x365 Network Operations Center (NOC) ensures your services are continually monitored and issues are immediately addressed.
- We back our commitment to you with industry- leading Service Level Agreements (SLAs).

States Served

22 States served

9,500 miles Fiber owned

14,000+ Licensed Microwave route miles owned

500+ Wireless towers owned

Premium Communications Services

You need communications services that support your business — not impede your ability to execute. Conterra Networks is a full-service communications provider who understands your needs and has a 15-year track record of delivering high-performance network solutions.

Dedicated Networks

We provide a turn-key customized network design that is a dedicated solution based on your requirements. Avoid traditional switched, cloud-based, and Metro-E type service offerings with a 100% symmetrical, scalable network with preset price schedules.

Dark Fiber Solutions

Our Dark Fiber offering allows your organization the maximum flexibility to implement your own services, including bandwidth and SLAs. You have the freedom to select your own equipment and manage your capacity needs. We provide stand-alone OAM as well.

Ethernet Solutions

With the support of Conterra Networks' Ethernet Services' Layer 2 point-to-point, point-to-multipoint, and multipoint-to-multipoint topologies, your LAN Ethernet network can be seamlessly extended to your WAN.

Internet Solutions

Our robust Internet services support speeds from 10 Mbps to 10 Gbps with low latency. We leverage our tier 1 relationships to offer diversity options that guarantee your connectivity.

Why Conterra Networks?

Customization

Build the most effective solution with a customized arrangement of transport services to fit your specific needs.

Flexibility

Choose from fiber, microwave and hybrid networks to address your communication needs — no matter where.

Scalability

Partner with an experienced, high-capacity network provider that builds communication solutions that enable your organization to grow and expand.

Reliability

Experience industry-leading performance with 99.99% availability in every network we design, build, and manage.

Conterra Broadband provides us with a highly reliable, scalable, private WAN across our 103 sites that delivers dedicated 10 Gbps to every EPISD high school, and 1 Gbps to middle and elementary schools. This private network allows our technology platforms to evolve within a cloud-based environment.
