

Premium Communications Services

Government, State and Local Organizations need communication services that support their constituents - not impede their ability to execute. Conterra Networks is a full communication service provider, understands the needs of Government organizations and has a 15-year track record of delivering high-performance network

Dedicated Networks

We provide a turn-key customized network design that is a dedicated solution based on your requirements. Avoids traditional switched, cloud based, and Metro-E type service offerings with a 100% symmetrical scalable network with preset price schedules.

Ethernet Solutions

With Conterra Networks' Ethernet services support of Layer 2 point-to-point, point-to-multipoint, and multipoint-to-multipoint topologies, your LAN Ethernet network can be seamlessly extended to your WAN.

Dark Fiber Solutions

Our Dark Fiber offering allows your organization the maximum flexibility to implement your own services including bandwidth and SLAs. You have the freedom to select your own equipment and manage your capacity needs. We provide stand-alone OAM as well.

Internet Solutions

Our robust Internet Services support speeds from 10 Mbps to 10 Gbps with low latency. We leverage our tier 1 relationships to offer diversity options that guarantee your connectivity.

Why Conterra Networks?

Customization

Build the most effective solution with a customized arrangement of transport services addresses your specific needs.

Flexibility

Choose from Fiber, Microwave and Hybrid networks to address your communication needs – no matter where.

Scalability

Partner with an experienced high-capacity network provider that builds communication solutions to enable your future growth and expansion.

Reliability

Experience industry leading performance with 99.99% availability that is built into every network we design, build and manage.

Conterra Broadband provides us with a highly reliable, scalable, private WAN across our 103 sites that delivers dedicated 10 Gbps to every EPISD high school, and 1 Gbps to middle and elementary schools. This private network allows our technology platforms to evolve within a cloud-based environment.
